REGIONAL WEATHER INFERENCE

BAY OF BENGAL:

- ✚ An upper air cyclonic circulation lies over Southeast Bay and adjoining Equatorial Indian Ocean and extends between 1.5 and 3.1 kilometres above mean sea level.
- ✚ With the development of this upper air cyclonic circulation, conditions are favourable for further advance of Southwest monsoon into some more parts of Southwest Bay, Southeast Bay and Eastcentral Bay during subsequent 2-3 days.
- ✚ Monsoon generally moderate over parts of Southwest Bay, Southeast Bay, Eastcentral Bay and over Andaman sea.
- ✚ Weather seasonal rest Bay of Bengal.

ARABIAN SEA:

- ✚ Weather seasonal Arabian Sea.

REGIONAL:

- ✚ An upper air cyclonic circulation lies over Southeast Bay and adjoining Equatorial Indian Ocean and extends between 1.5 and 3.1 kilometres above mean sea level.
- ✚ With the development of this upper air cyclonic circulation, conditions are favourable for further advance of Southwest monsoon into some more parts of Southwest Bay, Southeast Bay and Eastcentral Bay during subsequent 2-3 days.
- ✚ Yesterday's upper air cyclonic circulation over South Chattisgarh and adjoining Odisha extending upto 0.9 kilometres above mean sea level and trough from this system to Rayalaseema extending upto 0.9 kilometres above mean sea level has become less marked.
- ✚ Yesterday's upper air cyclonic circulation over Rayalaseema and neighbourhood at 1.5 kilometres above mean sea level persists.
- ✚ An upper air cyclonic circulation lies over Southwest and adjoining Westcentral Arabian sea and extends upto 1.5 kilometres above mean sea level.
- ✚ Hanmakonda and Ramagundam recorded the highest maximum temperature of 45 degree Celsius in the region.
